

Fortinet's FortiGate systems are purpose-built appliances that provide comprehensive security capabilities including: firewall, antivirus, antispymware, intrusion prevention, web filtering, spam filtering, SSL/IPSEC VPN, traffic shaping and management tools. Fortinet's line of small-to-medium business, Enterprise ROBO/SOHO and MSSP Secure CPE network appliances offer comprehensive security to distributed networks, meeting the needs for an array of mission critical applications such as Email, Web, VoIP, IM, and P2P with extensive management, logging, and reporting capabilities.

KEY HIGHLIGHTS

Extremely High Price/Performance Ratio

- Low total cost of ownership -- the FortiGate-50 series, for example boasts 50Mbps firewall performance for less than US \$500.
- Integrated multi-port switch for simple SOHO/ROBO installations, eliminating the need for additional gear.
- No per-user license fees -- each FortiGate system has full security capabilities without user restrictions.
- No additional software license for UTM features

Comprehensive Multi-threat Security

- Complete Unified Threat Management (UTM) features in a single hardened appliance
 - Firewall
 - VPN (IPSEC & SSL)
 - Intrusion Prevention System
 - Web content filtering
 - Antivirus and Antispymware
 - Antispam
 - IM and P2P Firewall

Complete Connectivity Options

- LAN, WAN, and DMZ interfaces
- Wireless 802.11a/b/g, ADSL Annex A, and dial backup modem
- PC Card slot for optional 3G wireless connectivity

VOIP, IM, and P2P Protocol Support

- Anti-virus scanning within AOL, MSN, Yahoo and ICQ protocols
- IM Username policy controls
- Rate-limiting of popular peer to peer protocols (KaZaa, Gnutella, BitTorrent, WinNY)

Automated Updates of Antivirus, Antispymware, and IPS Signatures

- Around-the-clock protection from the latest threats
- Virus and intrusion protection database with more than 40,000 signatures

Comprehensive Logging / Reporting with FortiManager and FortiAnalyzer

- Web, email and IM application usage reports
- Protocol and application specific reports
- Real-time, on-demand & scheduled report generation
- Centralized, remote management ideal for MSSP's and large distributed Enterprise networks

FortiGate-50B

LAN / WAN / DMZ	3 / 2 / 0
Firewall/VPN 3DES	50/48 Mbps
IPSec VPN tunnels	20

FortiWifi-50B

LAN / WAN / DMZ	3 / 2 / 0
Wireless 802.11 b/g	Yes
POE (Powered Device)	Yes (1 port)
Firewall/VPN 3DES	50/48 Mbps
IPSec VPN tunnels	20

FortiGate-60B

LAN / WAN / DMZ	6 / 2 / 1
Analog modem	Yes
PC Card slot	Yes
Firewall/VPN 3DES	100/64Mbps
IPSec VPN tunnels	50

FortiWiFi-60B

LAN / WAN / DMZ	6 / 2 / 1
Analog modem	Yes
PC Card slot	Yes
Wireless 80211a/b/g	Yes
Firewall/VPN 3DES	100/64 Mbps
IPSec VPN tunnels	50

FortiGate-60ADSL

LAN / WAN / DMZ	4 / 2 / 1
ADSL interface	Annex A
Firewall/VPN 3DES	70/20 Mbps
IPSec VPN tunnels	50

FortiGate-100A

LAN / WAN / DMZ	4 / 2 / 2
Firewall/VPN 3DES	100/40 Mbps
IPSec VPN tunnels	80

Enterprise

- ✓ SOHO (Small Office/Home Office)
- ✓ ROBO (Remote Office/Branch Office)

Managed Security Service Provider

- ✓ Managed Security Service Provider CPE (Customer Premise Equipment)

Unified Threat Management

- ✓ All-in-One Platforms
- ✓ Network Flexibility Ethernet/DSL/WiFi
- ✓ Cost-Effective
